FEBRUARY IS NATIONAL

MONTH

**HEART DISEASE IS THE
#1 CAUSE OF DEATH IN THE UNITED STATES FOR
BOTH MEN AND WOMEN. THE GOOD NEWS?
HEART DISEASE CAN OFTEN BE PREVENTED.**

THE MAX PULSE *Saving lives through early detection*

The Max Pulse utilizes pulsewave analysis technology. During this 3 minute test, the blood's pulsewave is followed from the time it leaves the heart and travels through the blood vessels down to the finger, providing a snapshot into the cardiovascular system.

THE TEST ANALYZES:

- Overall cardiovascular health
- Heart Rate Variability and Mean Heart Rate
- Overall elasticity of large, small and peripheral arteries (arterial stiffness)
- Arteriosclerosis progress
- Blood circulation and remaining blood in the vessels after the systolic contraction of the heart
- Left ventricular ejection, contraction power
- Mental stress, physical stress, and resistance to stress

**TAKE 3 MINUTES THIS FEBRUARY AND SHOW
YOUR HEART SOME LOVE.**

*Call today to schedule
your 3 minute Max
Pulse screening!*
